

PARK SCHOOL

Numeracy

Progression in
Multiplication
including Written
Calculations

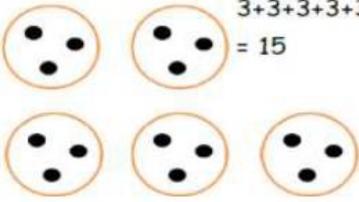

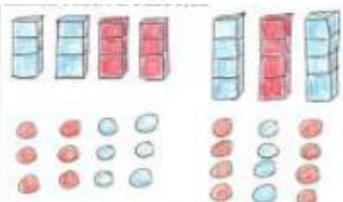

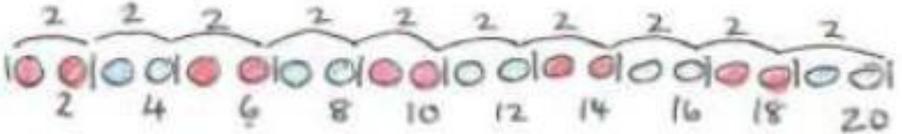

INTRODUCTION

At Park we follow the New National Curriculum (September 2014) and aim to provide a systematic approach to teaching number. This document demonstrates the progression in the mathematical written methods and approaches to calculations across years 1-6. There is a considerable emphasis on teaching mental calculation strategies and up to Year 3 pupils choose an informal written method to record how they work out their answers. The Standard Written Method is introduced when the child begins to work within year 3 and has a secure understanding of place value.

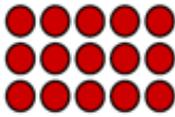

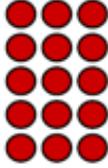

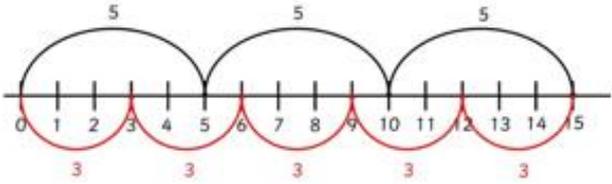

REASONS FOR USING WRITTEN METHODS

- To aid mental calculation by writing down some of the numbers and answers involved
- To make clear a mental procedure for the pupil
- To help communicate methods and solutions
- To provide a record of work
- To aid calculation when the problem is too difficult to be done mentally
- To develop and refine a set of rules for calculation

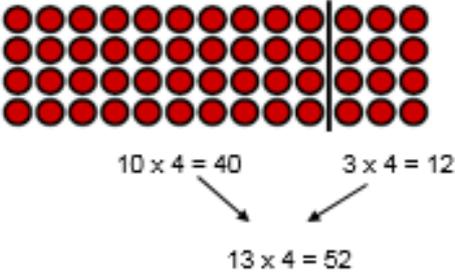

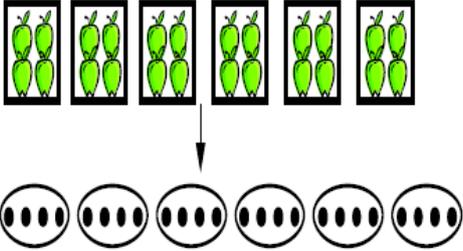

Year 1

Numeracy Objective	Example Method
<p>Solve one-step problems using concrete objects, pictures and arrays.</p> <p>Start to use the word 'Multiplication' but not the x symbol.</p>	<p>3 plates, 2 cakes on each plate:</p>  <p>3 plates of 2 cakes = 6 cakes</p> <p>How many legs will 3 teddies have?</p>  <p>$2 + 2 + 2 = 6$</p> <p>There are 3 sweets in 1 bag. How many sweets are there in 5 bags altogether?</p>  <p>$3+3+3+3+3 = 15$</p> <p>Use visual and concrete arrays to find the answer to '3 lots of 4'.</p> 
<p>Count in multiples of 2s, 5s, 10s</p>	

Year 2

Numeracy Objective	Example Method						
<p>Recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers.</p> <p>Calculate and write mathematical statements using the multiplication (x) and equals (=) sign.</p> <p>Show that multiplication of two numbers can be done in any order (commutative).</p>	<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>5 x 3</p> </div> <div style="text-align: center;">  <p>3 x 5</p> </div> </div> <p> $2 \times 5 = 10$ or $5 \times 2 = 10$ $4 \times 5 = 20$ or $5 \times 4 = 20$ $12 = 6 \times 2$ or $12 = 2 \times 6$ $70 = 7 \times 10$ or $70 = 10 \times 7$ </p> <p>Recognise odd and even numbers: 22 is a multiple of 2 as it is an even number. 45 is a multiple of 5 and is an odd number as it ends in '5'. 170 is a multiple of 10 and is an even number as it ends in '0'.</p>						
<p>Solve problems involving multiplication using materials, arrays, repeated addition, mental methods including problems in context.</p>	<p>There are three sweets in one bag. How many sweets are there in five bags?</p> <div style="text-align: center;">  </div> <p>Repeated addition: 5 bags of 3 sweets $(5 \times 3) = 3 + 3 + 3 + 3 + 3 = 15$ sweets</p> <p>Number line:</p> <div style="text-align: center;">  </div> <p>Bar Model:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td colspan="3" style="text-align: center;">Total?</td> </tr> <tr> <td style="text-align: center;">5</td> <td style="text-align: center;">5</td> <td style="text-align: center;">5</td> </tr> </table>	Total?			5	5	5
Total?							
5	5	5					

Year 3

Numeracy Objective	Example Method									
Recall and use multiplication facts for the 2,3,4,5, 8 and 10 times tables.	$1 \times 4 = 4$ $2 \times 4 = 8$ $3 \times 4 = 12$									
Write and calculate mathematical statements for multiplication, including for two-digit numbers times one-digit numbers (TUXU). Do this mentally and progress to a formal written method.	<p>Multiply by decomposing digits into known values:</p> $13 \times 4 = 52$ $10 \times 4 = 40$ $3 \times 4 = 12$  <p>TUXU using the grid method:</p> <table border="1" data-bbox="555 952 995 1149"> <thead> <tr> <th></th> <th>T</th> <th>U</th> </tr> </thead> <tbody> <tr> <th>x</th> <td>10</td> <td>3</td> </tr> <tr> <th>4</th> <td style="background-color: #00FF00;">40</td> <td style="background-color: #0000FF;">12</td> </tr> </tbody> </table> $40 + 12 = 52$ <p>TUXU using the short formal method:</p> $ \begin{array}{r} 13 \\ \times 4 \\ \hline 12 \text{ (3 x 4)} \\ + 40 \text{ (10 x 4)} \\ \hline 52 \end{array} $		T	U	x	10	3	4	40	12
	T	U								
x	10	3								
4	40	12								
Solve problems related to multiplication, including missing number problems.	<p>There are four apples in a box. How many apples in six boxes?</p> 									

Missing number problems:

$$8 \times \underline{\quad} = 48$$

$$\underline{\quad} = 4 \times 8$$

$$7 \times \underline{\quad} = 56$$

$$\bigcirc \times \bigcirc = 32$$

X

$$\bigcirc$$

5

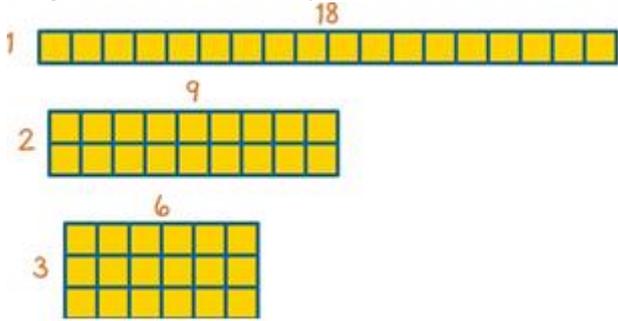

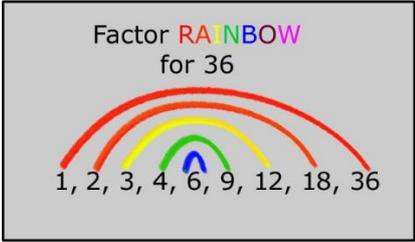

$$\bigcirc$$

=

$$\bigcirc$$

40

Year 4

Numeracy Objective	Example Method
Recall multiplication facts and tables up to 12 x 12.	$6 \times 12 = 74$ $4 \times 9 = 36$ $72 = 9 \times 8$ $12 \times 12 = 144$ $88 = 11 \times 8$ $6 \times 6 = 36$
Use place value, known and derived facts to multiply mentally, including: multiplying by 1 and 0; multiplying together three numbers.	<p>$70 \times 9 = 630$ can be derived from $7 \times 9 = 63$ $600 \times 3 = 1800$ can be derived from $6 \times 3 = 18$</p> <p>$7 \times 0 = 0$ $7 \times 1 = 7$ $0 \times 3 = 0$ $1 \times 3 = 3$ $0 = 8 \times 0$ $8 = 1 \times 8$</p> <p>$2 \times 3 \times 5 = 30$ ($3 \times 2 = 6, 6 \times 5 = 30$) $3 \times 3 \times 8 = 72$ ($3 \times 3 = 9, 9 \times 8 = 72$) $3 \times 5 \times 0 = 0$ ($3 \times 5 = 15, 15 \times 0 = 0$)</p>
Recognise and use factor pairs in calculations.	<p>Factor pairs are a set of two numbers that when multiplied together result in a number.</p> <p>Diagrams to show factor pairs for 18:</p>  <p>Factor rainbow for 36:</p>  <p>40 72 57 1×40 1×72 1×57 2×20 2×36 3×19 4×10 3×24 5×8 4×18 6×12 8×9</p>

Multiply two-digit and three-digit numbers by a one-digit number using a formal written layout.

TU X U
HTU X U

The grid Method:

$$43 \times 6 =$$

	T	U
x	40	3
6	240	18

$$\begin{array}{r} 40 \times 6 = 240 \\ + 3 \times 6 = 18 \\ \hline 258 \end{array}$$

Expanded vertical method:

$$237 \times 4 =$$

Estimate is $250 \times 4 = 1000$

$$\begin{array}{r} 237 \\ \times 4 \\ \hline 28 \quad (4 \times 7) \\ 120 \quad (4 \times 30) \\ 800 \quad (4 \times 200) \\ \hline 948 \end{array}$$

The short formal method:

24×6 becomes

$$\begin{array}{r} 24 \\ \times 6 \\ \hline 144 \\ \hline 2 \end{array}$$

Answer: 144

342×7 becomes

$$\begin{array}{r} 342 \\ \times 7 \\ \hline 2394 \\ \hline 21 \end{array}$$

Answer: 2394

Multiply by 10 and 100 by moving the digits up the place value line.

$$23 \times 10 =$$

TU	Times by 10, move one place to the left	HTU	Put zero in as space filler	<u>HTU</u>
23	→	23	→	230

$$46 \times 100 =$$

TU	Times by 100, move two place to the left	<u>ThHTU</u>	Put 2 zero in as space filler	<u>ThHTU</u>
46	→	46	→	4600

Year 5

Numeracy Objective	Example Method										
<p>Find all factor pairs of a number and common factors of two numbers.</p>	<p>Find the common factor pairs for 12 and 30:</p> <table border="1" data-bbox="564 360 992 629"> <thead> <tr> <th>Factors of 12</th> <th>Factors of 30</th> </tr> </thead> <tbody> <tr> <td>$12 = 1 \times 12$</td> <td>$30 = 1 \times 30$</td> </tr> <tr> <td>$12 = 2 \times 6$</td> <td>$30 = 2 \times 15$</td> </tr> <tr> <td>$12 = 3 \times 4$</td> <td>$30 = 3 \times 10$</td> </tr> <tr> <td></td> <td>$30 = 5 \times 6$</td> </tr> </tbody> </table> <p>Factors of 12: 1, 2, 3, 4, 6, 12</p> <p>Factors of 30: 1, 2, 3, 5, 6, 10, 15, 30</p> <p>1, 2, 3, and 6 are all factors of both 12 and 30.</p> <p>1, 2, 3, and 6 are called the common factors of 12 and 30.</p>	Factors of 12	Factors of 30	$12 = 1 \times 12$	$30 = 1 \times 30$	$12 = 2 \times 6$	$30 = 2 \times 15$	$12 = 3 \times 4$	$30 = 3 \times 10$		$30 = 5 \times 6$
Factors of 12	Factors of 30										
$12 = 1 \times 12$	$30 = 1 \times 30$										
$12 = 2 \times 6$	$30 = 2 \times 15$										
$12 = 3 \times 4$	$30 = 3 \times 10$										
	$30 = 5 \times 6$										
<p>Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers.</p>	<p>Use of long multiplication:</p> <p>256 x 18 (estimate: $250 \times 20 = 5000$)</p> $ \begin{array}{r} 256 \\ \times 18 \\ \hline 2048 \\ + 2560 \\ \hline 4608 \\ \hline 1 \end{array} $ <p>Use of the expanded method to multiply four digit numbers (ThHTU) by a single digit number (U):</p> <p>2327 x 8 (estimate: $2300 \times 10 = 23\ 000$)</p> $ \begin{array}{r} 2327 \\ \times 8 \\ \hline 56 \\ 160 \\ 2400 \\ 16000 \\ \hline 18616 \end{array} $ <p style="text-align: right; background-color: yellow;">Units first</p>										

Use of the compact vertical method to multiply decimals (U.t) by single digit numbers (U), using an estimate to check:

$$4.7 \times 8 =$$

Estimate $5 \times 8 = 40$

$$\begin{array}{r} 4.7 \\ \times 8 \\ \hline 45.6 \\ 5 \end{array}$$

Recognise and use square and cube numbers, and the notation for squared (2) and cubed (3).

Square Numbers

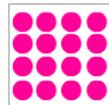

A square number is the product of multiplying a number by itself.

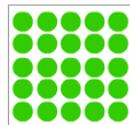

2^2 or $2 \times 2 = 4$

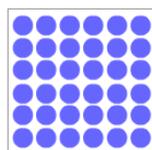

3^2 or $3 \times 3 = 9$

4^2 or $4 \times 4 = 16$

5^2 or $5 \times 5 = 25$

6^2 or $6 \times 6 = 36$

Square Numbers

$$\begin{array}{l} 1 \times 1 = 1^2 = 1 \\ 2 \times 2 = 2^2 = 4 \\ 3 \times 3 = 3^2 = 9 \\ 4 \times 4 = 4^2 = 16 \\ 5 \times 5 = 5^2 = 25 \end{array}$$

Cube Numbers

This is the product of multiplying the same number three times.

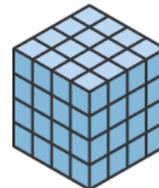

1 is the first cube number, because $1 \times 1 \times 1 = 1$

8 is the second cube number, because $2 \times 2 \times 2 = 8$

27 is the third cube number, because $3 \times 3 \times 3 = 27$

64 is the fourth cube number, because $4 \times 4 \times 4 = 64$

Cube Numbers

$$\begin{array}{l} 1 \times 1 \times 1 = 1^3 = 1 \\ 2 \times 2 \times 2 = 2^3 = 8 \\ 3 \times 3 \times 3 = 3^3 = 27 \\ 4 \times 4 \times 4 = 4^3 = 64 \\ 5 \times 5 \times 5 = 5^3 = 125 \end{array}$$

Year 6

Numeracy Objective	Example Method			
<p>Multiply multi-digit numbers up to 4 digits by a two-digit number using the formal written method of long multiplication.</p>	<p>Long multiplication:</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 33%; padding: 10px;"> $\begin{array}{r} \overset{1}{5},\overset{4}{280} \\ \times \quad 25 \\ \hline 26400 \end{array}$ </td> <td style="width: 33%; padding: 10px;"> $\begin{array}{r} \overset{1}{5},\overset{1}{280} \\ \times \quad 25 \\ \hline 26400 \\ 105600 \end{array}$ </td> <td style="width: 33%; padding: 10px;"> $\begin{array}{r} 5,280 \\ \times \quad 25 \\ \hline \overset{1}{26400} \\ + \overset{1}{105600} \\ \hline 132,000 \end{array}$ </td> </tr> </table>	$\begin{array}{r} \overset{1}{5},\overset{4}{280} \\ \times \quad 25 \\ \hline 26400 \end{array}$	$\begin{array}{r} \overset{1}{5},\overset{1}{280} \\ \times \quad 25 \\ \hline 26400 \\ 105600 \end{array}$	$\begin{array}{r} 5,280 \\ \times \quad 25 \\ \hline \overset{1}{26400} \\ + \overset{1}{105600} \\ \hline 132,000 \end{array}$
$\begin{array}{r} \overset{1}{5},\overset{4}{280} \\ \times \quad 25 \\ \hline 26400 \end{array}$	$\begin{array}{r} \overset{1}{5},\overset{1}{280} \\ \times \quad 25 \\ \hline 26400 \\ 105600 \end{array}$	$\begin{array}{r} 5,280 \\ \times \quad 25 \\ \hline \overset{1}{26400} \\ + \overset{1}{105600} \\ \hline 132,000 \end{array}$		
<p>Solve multi-step problems in contexts, deciding which operations and methods to use and why. Use estimation to check answers.</p>	<p>A football club has an average attendance of 859 people to each match. What is the total attendance for the 29 matches played in a season?</p> <p>6. Grace wants to buy seven of her friends a Christmas gift. She intends to buy each friend the same gift. She has £38.75 to spend. She has to choose between a mirror for £5.50 and a notepad and pen set for £5.60. Explain what Grace will do.</p> <div style="text-align: center;">  </div>
